BEADED GLASSES CHAINS

Rondelle Bead / 3 - 6mm

Crystal Matte AB

Crystal Lagoon

Crystal Celsius

Crystal Venus

Crystal Valentine

PRO TIP #1

Select five different colors of Rondelle beads and organize them from smallest to largest for each color and then lay them out in the order you plan to string them. Measure the desired length of your glasses chain adding a few extra inches to each end for securing the beads. We used nylon thread for the beading.

PRO TIP #2

Begin by threading the largest beads onto the nylon thread and gradually add smaller sizes as you move toward the middle of the chain. Once you reach the midpoint, switch to the smallest beads and gradually increase the bead size symmetrically as you move towards the other end.

PRO TIP #3

Check that all beads are secure and that the chain is symmetrical. Attach the glasses chain ends and make sure they are tightly secured to prevent the chain from breaking.
