

Design to Shine!

ACID YELLOW SLIDES

Chaton Rose MAXIMA no-hotfix, ss6, 10, 16

Acid Yellow

Acid Yellow AB

PRO TIP #1

Use a fast-drying glue, applying a single drop at a time to secure each crystal, one by one. Begin at the edges of straps and work your way into the center to achieve consistent lines.

PRO TIP #2

Use a mix of sizes (we used ss6, 10, and 16) and crystals with AB coating to achieve a tight, textured pavé.

PRO TIP #3

Loosen the pavé toward the base of the straps, where they connect to the sole, to achieve a soft, blended fade.
