

## City Lights Bracelet

Simple and stunning bracelet with new Matubo Ginko beads

### Material (for one bracelet)

Matubo Ginko (approx. 40 pcs)

Matubo 8/0 (approx. 2.7 gram)

Matubo 11/0 (approx. 3.7 gram)

Jump rings, a clasp

Beading needle and thread (Nymo, Fireline...)

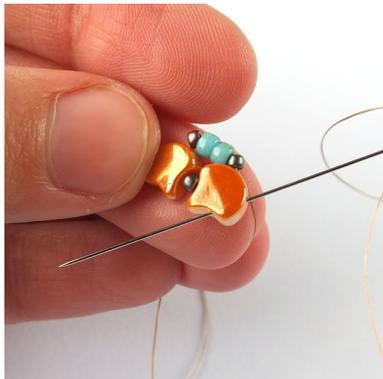

Difficulty: For beginners/intermediate

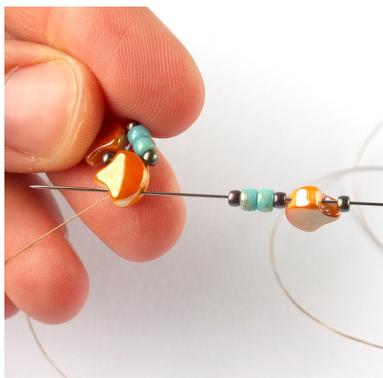

1) String one Ginko (from the outside), one 11/0, one Ginko (from the inside), one 11/0, two 8/0s and one 11/0.

2) Slide all the beads to the end of the thread. Leave a tail that is approx. 10in (25 cm) long. Then tie a square knot to make a circle. This is what you should get.

3) Go down through the free hole of the nearest Ginko bead.

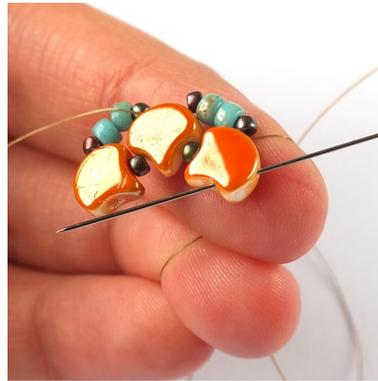

4) Add one 11/0, one Ginko (from the inside), one 11/0, two 8/0s and one 11/0 and then pass through the same hole of the same Ginko again.

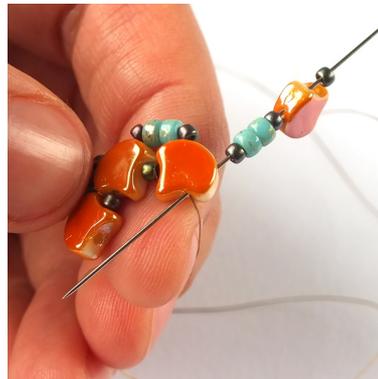

5) This is what you should get.

6) Pass through the new 11/0 and go up through the nearest hole of the new Ginko.

7) And then pass back through the free hole of the same Ginko.

8) Repeat steps 4 - 7 one more time.

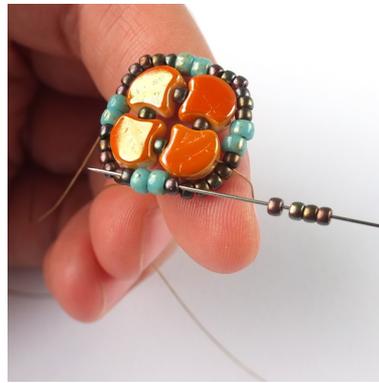

9) The thread is exiting from the free hole of the new Ginko (from the inside).

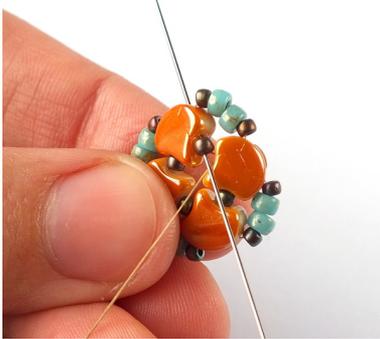

10) Add one 11/0 and go up through the free hole of the first Ginko (as shown in the photo).

11) Add one 11/0, two 8/0s and one 11/0 and go down through the same hole of the same Ginko you started from in the previous step.

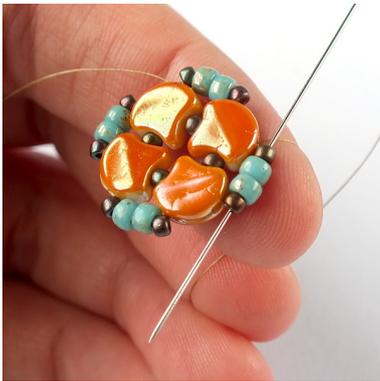

16) And then repeat steps 14 - 15 one more time.

12) Go up through the new 11/0 and the nearest hole of the nearest Ginko...

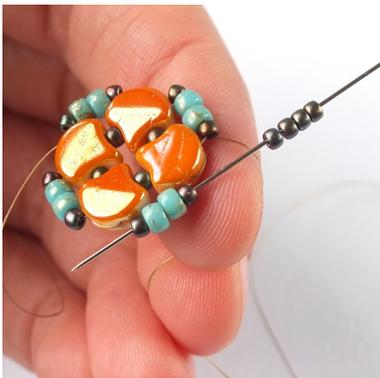

17) Always skip the four 11/0s you added in the previous row, add new four 11/0s and pass through the next group of (11/0, 2x8/0, 11/0).

13)... and then through the nearest group of (11/0, 2x8/0, 11/0).

18) At the end of the row, the thread is exiting from one of the (11/0, 2x8/0, 11/0) groups.

14) Add four 11/0s and pass through the next group of (11/0, 2x8/0, 11/0).

19) Add one 8/0, one 11/0, two 8/0s, one 11/0 and one 8/0 - and then pass through the same group of (11/0, 2x8/0, 11/0) again).

15) Repeat step 14, until you reach the end of the row.

20) Pass through the nearest new 8/0...

21)... and through the next (11/0, 2x8/0, 11/0).

26) Now finish the new unit (by repeating steps 4 - 18)...

22) Add one Ginko (from the outside), one 11/0 and one Ginko (from the inside) and then pass through the same group of (11/0, 2x8/0, 11/0) you exited from in the previous step.

23) Go down through the nearest hole of the nearest new Ginko...

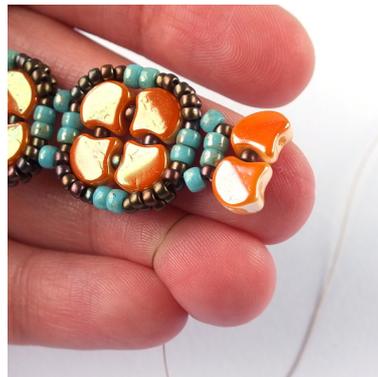

24)... and through the new 11/0 and then up through the nearest hole of the next new Ginko (as shown in the photo)...

27)...and add the connector for the next one (steps 19 - 21).

25)... and then pass back through the free hole of the same Ginko.

28) Keep adding new units, until you reach the desired length of the bracelet (each unit is approx. 2 cm (0,8 in) long).

29) When you reach the desired length...

34) This is what you should get.  
Tie a few half-hitch knots and cut off all the remaining thread.

30)... and the thread is exiting from the (11/0, 2x8/0, 11/0) group at the end of the bracelet.

35) Repeat steps 30 - 34 on the other side of the bracelet, using the other end of the thread. Then, again, tie a few half-hitch knots and cut off all the remaining thread.

31) Add two 11/0s, one 8/0 and two 11/0s and pass through the last group of (11/0, 2x8/0, 11/0) again.

36) Use jump rings to attach the clasp to the two 8/0s on each end of the bracelet.

32) Weave through all the new beads and through the (11/0, 2x8/0, 11/0) group one or two more times.

33) When weaving through these beads for the last time, skip the new 8/0. Pull snug.

## Colorways:

**Matubo Ginko** 03000/29503

**Matubo 8/0** 03000/15695

**Matubo 11/0** 00030/01640

**Matubo Ginko** 03000/29123
