SIMPLE DECORATION WITH PRECIOSA SEED BEADS

Christmas is Around *the Corner*

PRECIOSA

Christmas is Around the Corner

Christmas is fast approaching and along with it the time for Christmas decorations! Be inspired by this simple tutorial on how to make a cute decoration with seed beads. Pour the seed beads into a small bottle according to your taste. Use these decorations to decorate a gift or a twig and the magic of Christmas can commence.

Materials and tools:

PRECIOA Rocailles (R)

331 19 001; 10/0; 08A18;
5 g for several small bottles
depending on their size

331 19 001; 6/0; 08A18;
5 g for several small bottles
depending on their size

331 19 001; 10/0; 08A19;
5 g for several small bottles
depending on their size

331 19 001; 6/0; 08A19;
5 g for several small bottles
depending on their size

PRECIOSA Farfalle (F)

321 90 001; 2 x 4; 20206 gold;
5 g for several small bottles
depending on their size

321 90 001; 2 x 4; 01710 gold matt;
5 g for several small bottles
depending on their size

321 90 001; 2 x 4; 46316 white coffee;
5 g for several small bottles
depending on their size

321 90 001; 2 x 4; 46112 beige;
5 g for several small bottles
depending on their size

- small glass bottles (pendants)
with a cork stopper + a threaded metal eye –
drop 13 x 30 mm; small bottle 13 x 30 mm;
target 20 x 28 mm; flask; star; heart

- a 3 mm wide ribbon; scissors;
cylinders of varying diameters
(5 cm; 7.5 cm), for example a spray can,
a glass, a drink can; a ruler; liquid
dispersion glue; wooden skewers

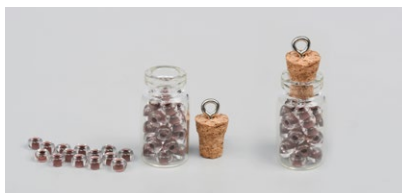

Difficulty: ● ● ● ● ●

Technique: pouring, tying

Procedure:

Step 1

Pour or individually place the **F** into
the bottles. Leave the bottle neck empty.
Put the cork stopper in the bottle.
Press it down into the neck. If the stopper
has no eye, screw a threaded metal eye
into it.

Step 2

Use a container in the shape of a cylinder.
Cut off the ribbon. A container with
a 5 cm diameter will require 40 cm
of ribbon, while a diameter of 7.5 cm will
require 50 cm. Turn the ribbon around
the cylinder. Tie a regular single knot
before tying a bow. Both ends of the bow
should be approximately the same length.
Create a loop out of the left-hand end
next to the knot. Twist the right-hand end
around the left-hand one.

A gap will be created between the loop and
the right-hand end of the ribbon.
Pull the twisted right-hand end of the
ribbon through it. This will create a second
loop. Pull on both loops and tighten
the bow. You can change the size of the
loops by pulling on the ends or directly
behind the loop.

Be careful that the bow does not loosen
during this process. Carefully remove
the tied bow from the cylinder.
Apply a drop of glue to the back of the bow
using a wooden skewer. Let it dry (1 hour).
Shorten the end of the ribbon.
This process is best-suited to right-handed
people.

Step 3

Fold the circle of ribbon created when tying
the bow around the cylinder in half.
Pull the folded ribbon through the eye
in the stopper. You can use the scissor
points to help you. Pull on the folded ribbon
until the bow sits on the cork stopper.
