PRECIOSA

Seed bead flower

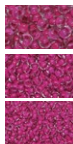

Let your jewelry collection blossom! Make some playful and brilliant seed bead flowers that you can connect into an original necklace or earrings. Choose any colors that you like. We have used seed beads from the PRECIOSA Terra Intensive Lining collection. This tutorial is suitable for both beginners and more advanced beadworkers – all you need is a little patience, skilful hands and a love of seed beads.

Materials and tools:

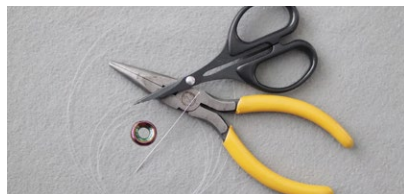

PRECIOSA Rocailles
331 19 001; 6/o 08A26 R6

331 19 001; 8/o; 08A26 R8

331 19 001; 10/o; 08A26 R10

- a 0.20 mm line; a sewing needle; scissors; pliers; fishing rings

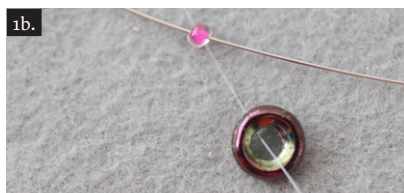

Difficulty: ●●●●●

Technique: basic beadweaving

Procedure:

Step 1

Cut off about 100 cm of the line. String 1x R8, thread the line through a fishing ring (fig. no. 1a) and return to the R8 (fig. nos. 1b + 1c).

Step 2

String 1x R8, thread the line through the fishing ring and then return to the R8 (fig. nos. 2a + 2c). Continue this procedure until you have sewn around the circumference of the ring (fig. no. 2d). Tie a knot and the row is finished (fig. no. 2e).

Step 3

String 2x R8, pass the needle under the line and return through one R8 (fig. nos. 3a + 3d).

Step 4

String 1x R8, pull the needle under the line and return to the R8 (fig. nos. 4a + 4b). Repeat this until such time as the entire row around the circumference has been completed. You should have added an odd number of R8 in this row. At the end, pass the needle through the top of the R8 that was first added in the second row and return upwards through the next R8 (fig. nos. 4c + 4d).

Step 5

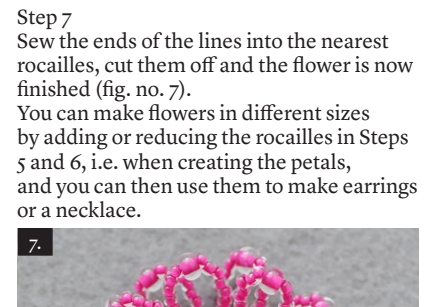

The line emerges upwards from the **R8**. String 8x **R10**, 1x **R6** and 8x **R10** and pull the needle downwards through the adjacent **R8** (fig. nos. 5a + 5b). Pull the needle upwards through the adjacent **R8** (fig. no. 5c). Repeat this step until all the petals have been completed (fig. nos. 5d + 5h).

Step 6

Turn the flower over (fig. no. 6a) and fill in the spaces between the petals from the last step. String 8x **R10**, 1x **R6** and 8x **R10** and pull the needle downwards through the adjacent **R8** (fig. nos. 6b + 6c).

Pull the needle upwards through the adjacent **R8** (fig. nos. 6d). Repeat these steps until you have all the petals (fig. nos. 6e + 6g).

Step 7

Sew the ends of the lines into the nearest roccailles, cut them off and the flower is now finished (fig. no. 7).

You can make flowers in different sizes by adding or reducing the roccailles in Steps 5 and 6, i.e. when creating the petals, and you can then use them to make earrings or a necklace.
