

You can thread the line through the second row again in order to make the part sufficiently strong (fig. no. 20). Then tie a knot and sew in the end of the line.

Repeat steps 1 to 8 to complete both the earrings (fig. no. 21).

Step 9:
Attach the rings to the hooks using pliers.
Leave the 8 mm ring open (fig. no. 22) and thread it through the top of the sewn earring

and then close it using pliers (fig. no. 23). Repeat for the second earring and then the set will be finished (fig. no. 24).

Design by Jana Shweiki

PRECIOSA Bow™

111 01 382; 3,5 x 15,5 mm

PRECIOSA Rocailles

331 19 001; 10/0

PRECIOSA ORNELA introduces beads and seed beads from the PRECIOSA Traditional Czech Beads™ brand.

Preciosa-Ornela.com

Spinner

PRECIOSA ORNELA presents yet another of the new shapes in the pressed beads from the PRECIOSA Traditional Czech Beads™ brand. Experiment with using the bent, two-hole PRECIOSA Bow™ bead and make an effective set of earrings according to a design by Jana Shweiki.

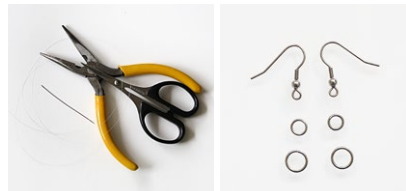

Materials and tools:

PRECIOSA Bow™ (B)
111 01 382; 3,5 x 7,5 cm; 02010/14457; 12X

PRECIOSA Pressed Bead (PB)
111 19 001; 4 mm; 50200; 12X

PRECIOSA Rocailles (R)
331 19 001; 9/0; 01154; 72X

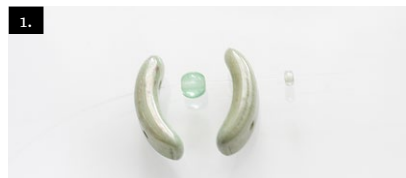

a 0.20 mm line – a length of ca 2x 60 cm;
a sewing needle; scissors; pliers
2x hooks; 2x 6 mm rings; 2x 8 mm rings

Difficulty: 

Procedure:

Step 1:
String 1x B, 1x PB, 1x B and 1x R (fig. no. 1) and then repeat two more times (fig. no. 2).

Step 2:
Tie the line into a circle with a double knot (fig. no. 3) so that you still have one end of the line at a length of about 5 cm for sewing in (you can sew it in straight away, so that the end of the line does not get in your way). Thread the line through the circle several more times so that it is very strong.

Step 3:
Thread the needle through the nearest R (fig. no. 4), string 5x R (fig. no. 5) and thread the needle through the top hole of the B (fig. no. 6 + fig. no. 7).

Step 4:
Thread 1x R, 1x PB and 1x R (fig. no. 8) and thread the needle through the top hole of the B (fig. no. 9 + fig. no. 10).

Step 5:
Add 5x R (fig. no. 11) and thread the needle through the rocaille between the B from the first row (fig. no. 12).

Step 6:
You must thread the needle through the first rocaille above the rocaille between the B in an upwards direction (fig. no. 13). Add 4x R (fig. no. 14) and thread the needle through the top hole of the B one more time (fig. no. 15).

Step 7:
Repeat steps 4, 5 and 6 and then step 4 again. The line should emerge from the top hole of the B. Add 4x R (fig. no. 16) and thread the needle through the first rocaille above the connecting R between the B from the first row in a downwards direction (fig. no. 17).

Step 8:
Thread the needle through the R between the B from the first row (fig. no. 18) and then through the five R in an upwards direction (fig. no. 19).
