

# Tango™ Star

## Bracelet

### Remix

### Materials Needed:

- 74" Thread
- 1 Beading Needle
- 1 Set of Pliers
- Glue

DIAMOND DUO™ 2-HOLE BEAD 5X8MM CHALK LUMI PURPLE - 50 GRAM BAG (APX 340 PCS)  
 PRODUCT#: DD/CW15726/58  
 NEW

Apx. 38 Beads Needed

TANGO™ BEAD 2-HOLE 6MM MATTE COPPER - 50 GRAM BAG (APX 325 PCS)  
 PRODUCT#: TG/MC/6

Apx. 32 Beads Needed

11/0 BRONZE CZECH SEED BEADS - HK: 12 STRINGS OF 20 INCH (APX 36G)  
 PRODUCT#: HSB/59142/11/0

Apx. 170 Beads Needed

11/0 PURPLE OPAQUE LUSTER CZECH SEED BEADS - HK: 12 STRINGS OF 20 INCH (APX 36G)  
 PRODUCT#: HSB/28020/11/0

Apx. 60 Beads Needed

10MM RING + 16MM BAR CLASP SET, 3/8 INCH ANNA, ANTIQUE COPPER - PKG OF 10 TIERRACAST BRITANNIA PEWTER  
 PRODUCT#: TC94-6151-18

1 Set Needed

JUMP RING, 6MM ROUND, 19 G, COPPER - PKG OF 100 TIERRACAST FINDINGS  
 PRODUCT#: TC01-0025-18

2 Pcs. Needed

### Seed Bead Loop & Outer Ring of Starburst

1) Thread a needle with 74" of thread. Create a seed bead loop by threading a DD (left hole), then stringing 7 SB, and looping back into the same DD (left hole). Turn thread's direction, and go back into the same DD just emerged from (right hole). Add SB, TG (through long hole), 4 SB.

Start Here at Seed Bead Loop

### Outer Ring of Starburst

2) Continue clockwise, thread TG Diamond (outer holes), add 4 SB, TG (longer hole), SB, DD (left hole), SB, TG (longer hole).

### Outer Ring of Starburst

3) Continue moving clockwise, add 4SB, through TG Diamond (outer holes), add 4 SB, TG (longer hole), SB, DD (right hole). Re-thread SB, TG (longer hole).

### Outer Ring of Starburst

4) Turn thread's direction- re-entering TG (short hole). Moving counter-clockwise, Add 2 SB, thread existing TG (short hole). Add SB, DD (left hole), then 2 SB. Continue through TG Diamond (short holes).

### Outer Ring of Starburst

5) Continuing in a counter-clockwise motion, add 2 SB, DD (outer hole), SB, TG (short hole). Add 2 SB, existing TG (short hole), Add SB, DD (outer hole), 2 SB. Thread TG Diamond (short holes), Add 2 SB, DD (outer hole) SB. Thread existing TG (short hole), add 2 SB, TG (short hole). Re-thread SB, DD (outer hole).

### Inner Ring of Starburst

6) Turn thread's direction 180 degrees, re-enter DD (through inner hole), continuing in a clockwise motion, add SB, thread DD (inner hole), add SB, thread DD (inner hole), add SB, thread DD (inner hole). Add SB, then re-thread same holes of same beads of inner ring of starburst. Pull to tighten. After emerging from inner hole of DD, turn thread's direction 180 degrees, enter that same DD's outer hole. Re-thread SB, TG (short hole), 2 SB, TG (short hole). Turn thread's direction 180 degrees, re-enter TG (long hole), re-thread SB, DD (left hole).

### Bridge Connector Between Starbursts

7) Add SB, add DD (left hole), 5 SB (use alt. color), re-enter same DD (right hole). Add DD (left hole), thread existing DD (right hole), add DD (left hole), add DD (right hole), thread 5 SB (use alt. color), turn thread's direction, re-enter same DD (left hole), add SB. Moving counter-clockwise, re-thread DD (left hole), SB, DD (left hole), 5 SB, DD (right hole), DD (left hole). Turn thread's direction, re-enter same DD (right hole).

### Bridge Connector Between Starbursts

8) Continuing in a counter-clockwise motion, add DD (left hole), 5 SB (use alt. color), turn thread's direction, re-enter same DD (right hole), Add SB, DD (right hole), add SB. Add DD (right hole), 5 SB (use alt. color), turn thread's direction, re-enter same DD (left hole), thread existing DD (right hole), existing DD (left hole), existing DD (right hole). Re-thread same holes of same beads: DD (left hole), 5 SB, DD (right hole), SB, and finally, re-thread DD (right hole). This center DD will serve as the first DD of the next starburst in the bracelet.

### Repeat Steps & Attach Toggle/Clasp

9) Repeat steps 1 - 8 until the desired length of bracelet is beaded. Create a seed bead loop by re-entering same DD (right hole) just emerged from, adding 7 SB, then looping back into last added DD (right hole). Turn thread's direction, re-enter DD (left hole), re-thread adjacent SB, TG (long hole), 4 SB. Tie a half-hitch knot, dot knot with glue, and tuck knot inside TG (long hole). Using pliers, close jump ring around seed bead loop and Toggle/Clasp at left/right side of bracelet to finish.

### KEY

- Entry Point
- Half-Hitch Knot
- Thread's Direction
- Previous Steps
- = DiamonDuo™ DD Bead
- = Seed Bead SB
- = Tango™ TG Bead
- = Tango™ TG Diamond

**Please note:** When instructions refer to "left" or "right" sides, it is as if looking down at the beads, from a bird's eye perspective; as are the graphics.
